

In the Specification:

**Please amend the paragraph bridging pages 77 and 78
of the present specification as follows:**

Further, the program code may be supplied to the AV data production apparatus 10 via a communication network to which the AV data reproducing apparatus 10 is connectable. The communication network is not particularly limited. Specific examples thereof are: the Internet, intranet, extranet, LAN (local area network), ISDN (integrated services digital network), VAN (value added network), CATV (cable TV) communication network, telephone network, mobile communication network, satellite communication network and the like. Further, the transmission medium constituting the communication network is not particularly limited. Specific examples thereof are: (i) a wired line using the IEEE (Institute of Electrical and Electronics Engineers) 1394, a USB (universal serial bus), a power-line communication, a cable TV line, a telephone line, a ADSL line, or the like; or (ii) a wireless line using IrDA, infrared rays used for a remote controller, Bluetooth®, IEEE 802.11, HDR (High Data Rate), a mobile phone network, a satellite connection, a terrestrial digital network or the like. ~~Note that the present invention can be realized by either a carrier wave or a data signal row, each of which represents the aforesaid program code and each of which is electrically transmitted.~~
